Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29 and 33-36, drawn to a wet shaving system including a blade member and a skin engaging portion including a shaving aid, and a shaving aid composite having a plurality of exfoliating elements embedded in the shaving aid matrix, a polymer, or a first polymer, classified in class 30, subclass 41.
 - II. Claims 37-46, drawn to a shaving aid composite including a microcapsules having a shaving aid embedded in the shaving matrix, classified in class 30, subclass 77.

It should be noted that claims 30-32 will be examined with either elected Group I or elected Group II.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the invention in Group I includes a skin engagement portion having a shaving aid and a plurality of exfoliating elements embedded in the shaving matrix or a polymer which has a separate utility such as it could be used without the microcapsules having a shaving aid embedded in the shaving matrix in the invention of Group II. Conversely, the invention in Group II includes microcapsules having a shaving aid embedded in the shaving matrix which has a separate utility such as it could be used without the skin engagement portion having a shaving aid and the plurality of exfoliating elements embedded in the shaving matrix or a polymer in the invention of Group I.

Art Unit: 3724

3. Upon the election of one of the Groups above then applicant must further elect a single Species from each one of the Group of the following Species:

Group A

Species I. Fig. 1

Species II. Fig. 2

Species III. Fig. 3

Species IV Fig. 3A-3B

Species V Fig. 4

Species VI Fig. 5

Species VII Fig. 6

Species VIII Fig. 7

Species IX Fig. 8

Species X Fig. 9

Species XI Fig. 10

Species XII Fig. 11

Species XIII Fig. 12

Group B

Species I Water-soluble polymer

Species II Water-insoluble polymer

Group C

Species I A chemical exfoliant comprises an alpha-hydroxy acid.

Species II A chemical exfoliant comprises a Beta-hydroxy acid.

Art Unit: 3724

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their divergent subject matter, restriction for examination purpose as indicated is proper.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

7. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

8. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor or at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR. 1.143).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ghassem Alie whose telephone number is (571) 272-4501. The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on (571) 272-4502. The fax phone number for the organization where this application or proceeding is assigned is (501) 273-8300.
